Pharmaceutical supply (block)chain

Ben Taylor, CEO

Why Hyperledger?

Positioning	Visionary	Enterprise-grade	Classic
Governance	Ethereum Foundation?	Linux Foundation	Hmmmm
Participation	Open with Velvet Ropes	Permissioned, private	Open
Consensus	PoW → PoS?	Pluggable consensus	PoW Mining
Smart contracts	Yes, typically Solidity	Yes, typically Go or Java	More basic
Currency	ether, gas, altcoins	None in native form	bitcoin

Hyperledger is the blockchain platform of choice for global enterprises concerned with data security and access to information regulations.

Blockchain's Potential for Privacy & Compliance

GDPR – HIPAA – CalPrivacy – New York Privacy Act?

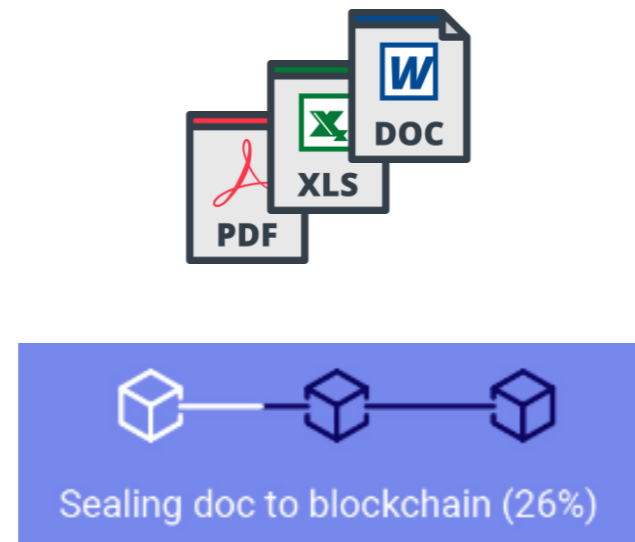

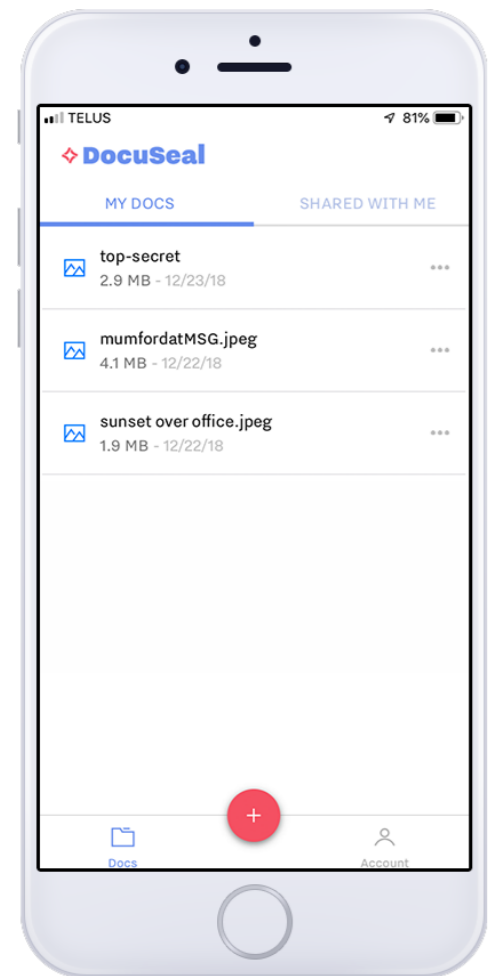

“Skate to where the puck is going” –Gretzky

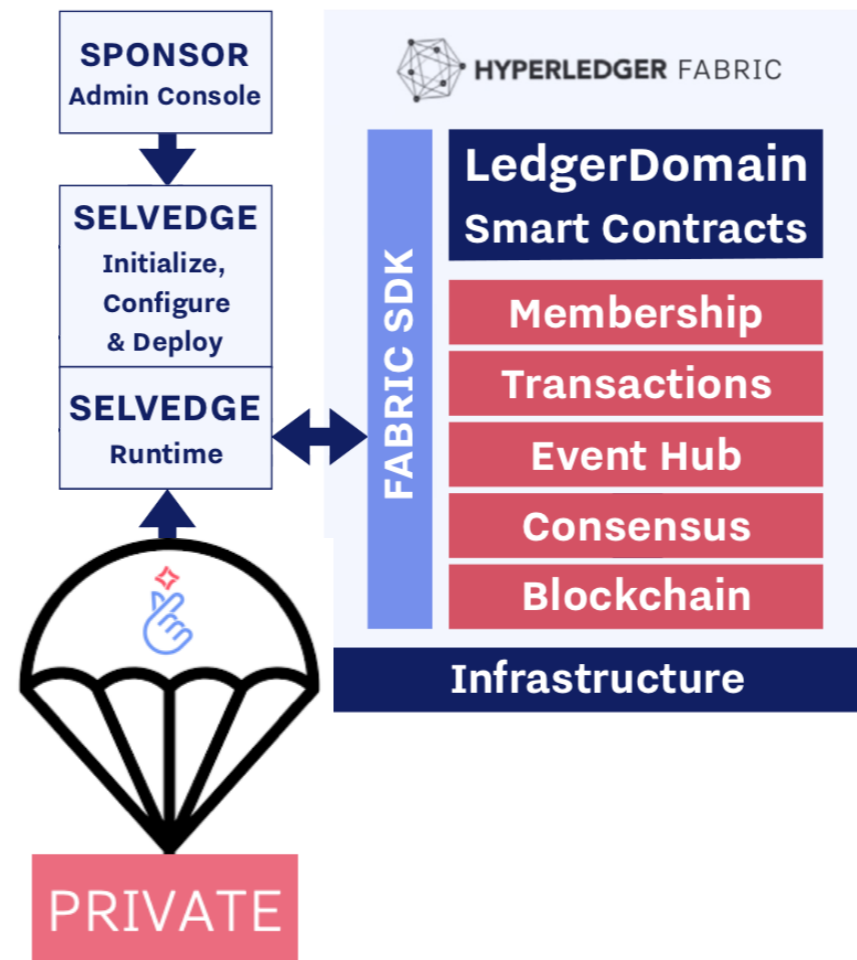

DocuSeal Framework

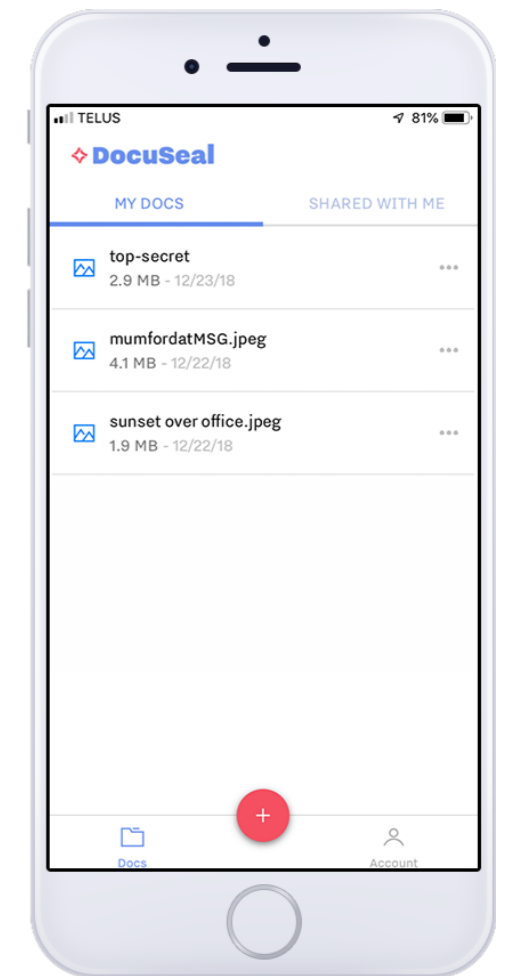

Uploaded documents are sealed in private storage, tied to unique hash that's immutably stored on private blockchain. The authenticity of medical documents and patient data is verified each time it's accessed.

Patient Registry

Harnessing Power of Intermediary Model

FDA and EMA have both advanced similar concepts for clinical studies

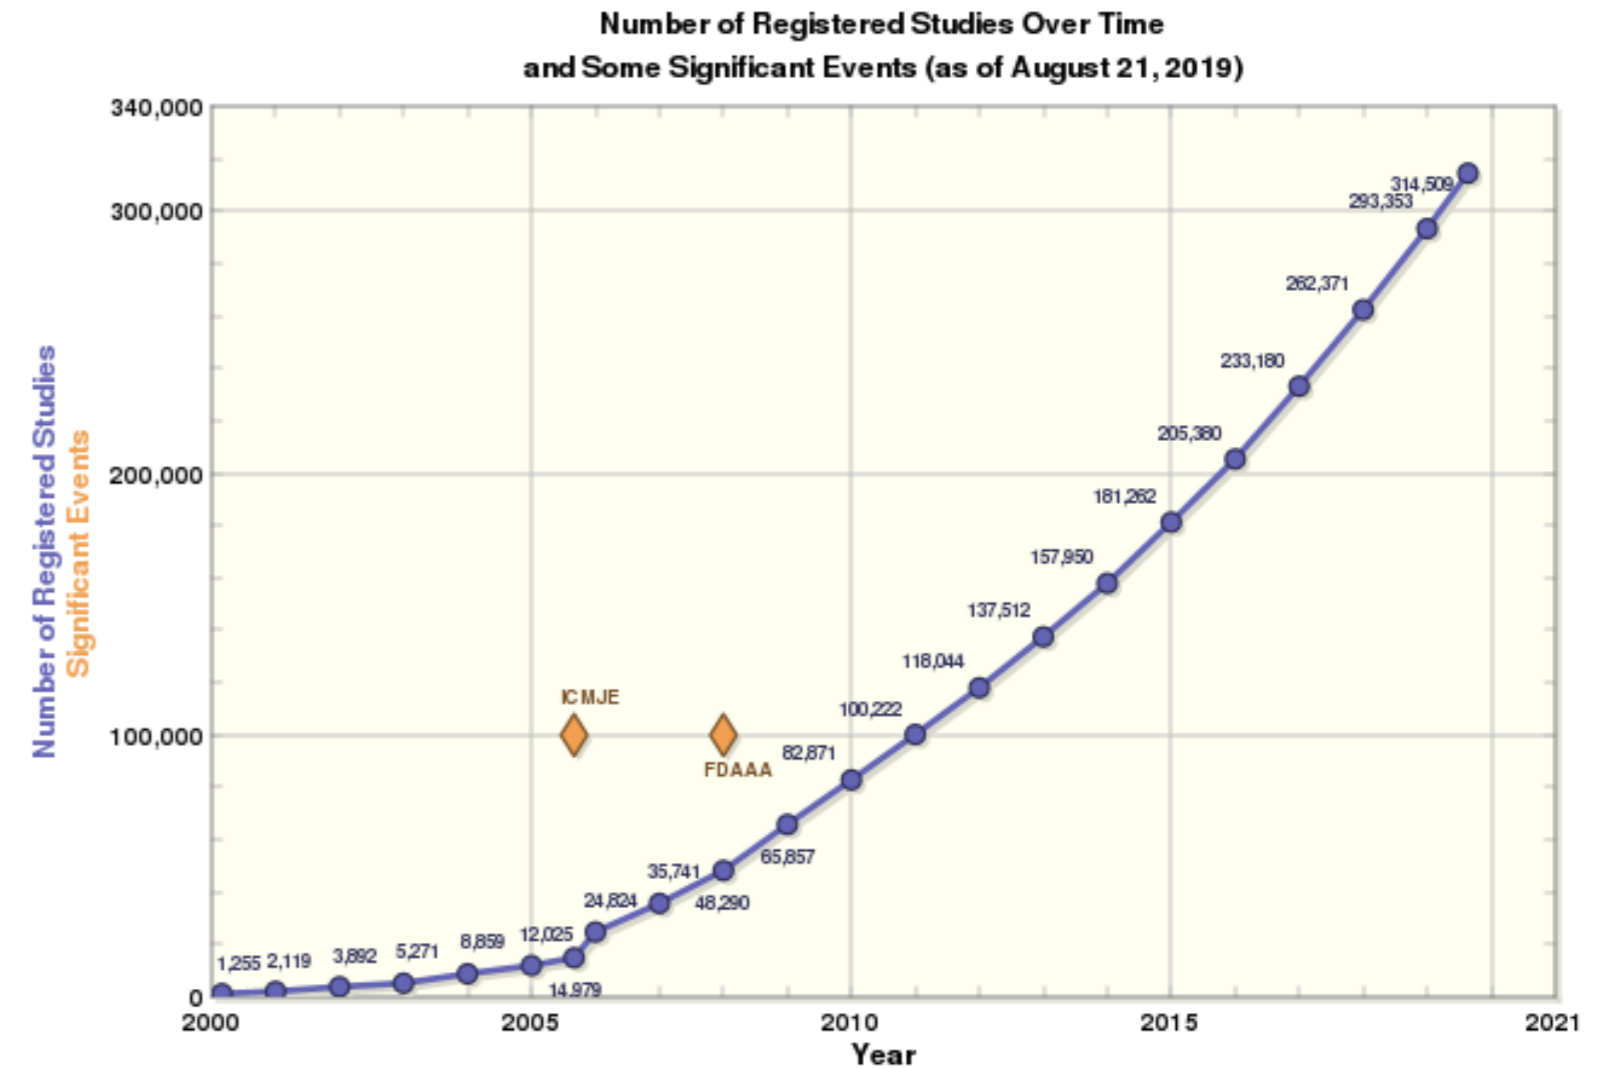

Patient Registry: Key Components

- Unique & anonymized identifier scheme
- Links to family, caregiver, doctor
- Core structured data fields & sources
- Off-chain data types, encryption & access
- Maintaining compliance with HIPAA and GDPR?
- Registry scheme: re-consent; outreach; registration

Clinical Supply: KitChain Pilot

- Active clinical studies have doubled over last 10 years, and clinical pharmacies are bursting at the seams
- In a landmark pilot program, our working group with broad industry participation scoped, developed, and tested a GS1-compliant collaborative blockchain solution aimed at delivering a win for patients awaiting new medicines

Clinical Supply Blockchain Working Group Charter

<p>WHAT TOPIC? What challenge(s) do you want to address?</p> <ul style="list-style-type: none">• Disparate group of parties involved in a chain of custody (CROs, sites, etc.)• Comparator products purchased via third party vendors• Adaptive trial design and ensuring product quality• Regulatory reporting , drug accountability and reconciliation• Site storage constraints• Multiple systems and product lines• GMP/GCP handoffs and compliance• Incorporation of IoT devices• Facilitation of payments (e.g. orders, shipments, VAT/Duty, etc.)	<p>IMAGINE A WORLD If this vision came true, what would the world look like?</p> <ul style="list-style-type: none">• Amazon-like user experience for supply chain managers, clinical sites and patients to track and trace investigational products from point of manufacture to acknowledgement of consumption by patients• Fully auditable and transparent system, that allows all stakeholders to have direct access to a trusted source of validated data			
<p>THINK ON THE FRINGE What ecosystem would be needed? Which internal and external stakeholders would we need to engage?</p> <ul style="list-style-type: none">• API Manufactures, CROs, CMOs, Couriers, Sites, Patients, Study Teams, Sourcing Groups, Customs, MOH	<p>START SMALL, REALLY SMALL What might we do together over the next few months to turn this vision into a a real experiment?</p> <table border="1"><tr><td data-bbox="1682 971 2025 1566"><p>Explore</p><ul style="list-style-type: none">• Evaluate opportunities for cross-industry alignment</td><td data-bbox="2025 971 2369 1566"><p>Evaluate</p><ul style="list-style-type: none">• Determine what makes the most sense to try to standardize• Attend education sessions and share learnings with working group</td><td data-bbox="2369 971 2718 1566"><p>Advance</p><ul style="list-style-type: none">• Good understanding of use cases in the clinical supply space• Gather requirements to support an industry POC</td></tr></table>	<p>Explore</p> <ul style="list-style-type: none">• Evaluate opportunities for cross-industry alignment	<p>Evaluate</p> <ul style="list-style-type: none">• Determine what makes the most sense to try to standardize• Attend education sessions and share learnings with working group	<p>Advance</p> <ul style="list-style-type: none">• Good understanding of use cases in the clinical supply space• Gather requirements to support an industry POC
<p>Explore</p> <ul style="list-style-type: none">• Evaluate opportunities for cross-industry alignment	<p>Evaluate</p> <ul style="list-style-type: none">• Determine what makes the most sense to try to standardize• Attend education sessions and share learnings with working group	<p>Advance</p> <ul style="list-style-type: none">• Good understanding of use cases in the clinical supply space• Gather requirements to support an industry POC		

“Bringing an Amazon-like Experience to Clinical Supply”

Clinical Supply Chain Roles

KitChain Demo Video

“Bringing an Amazon-like Experience to Clinical Supply”

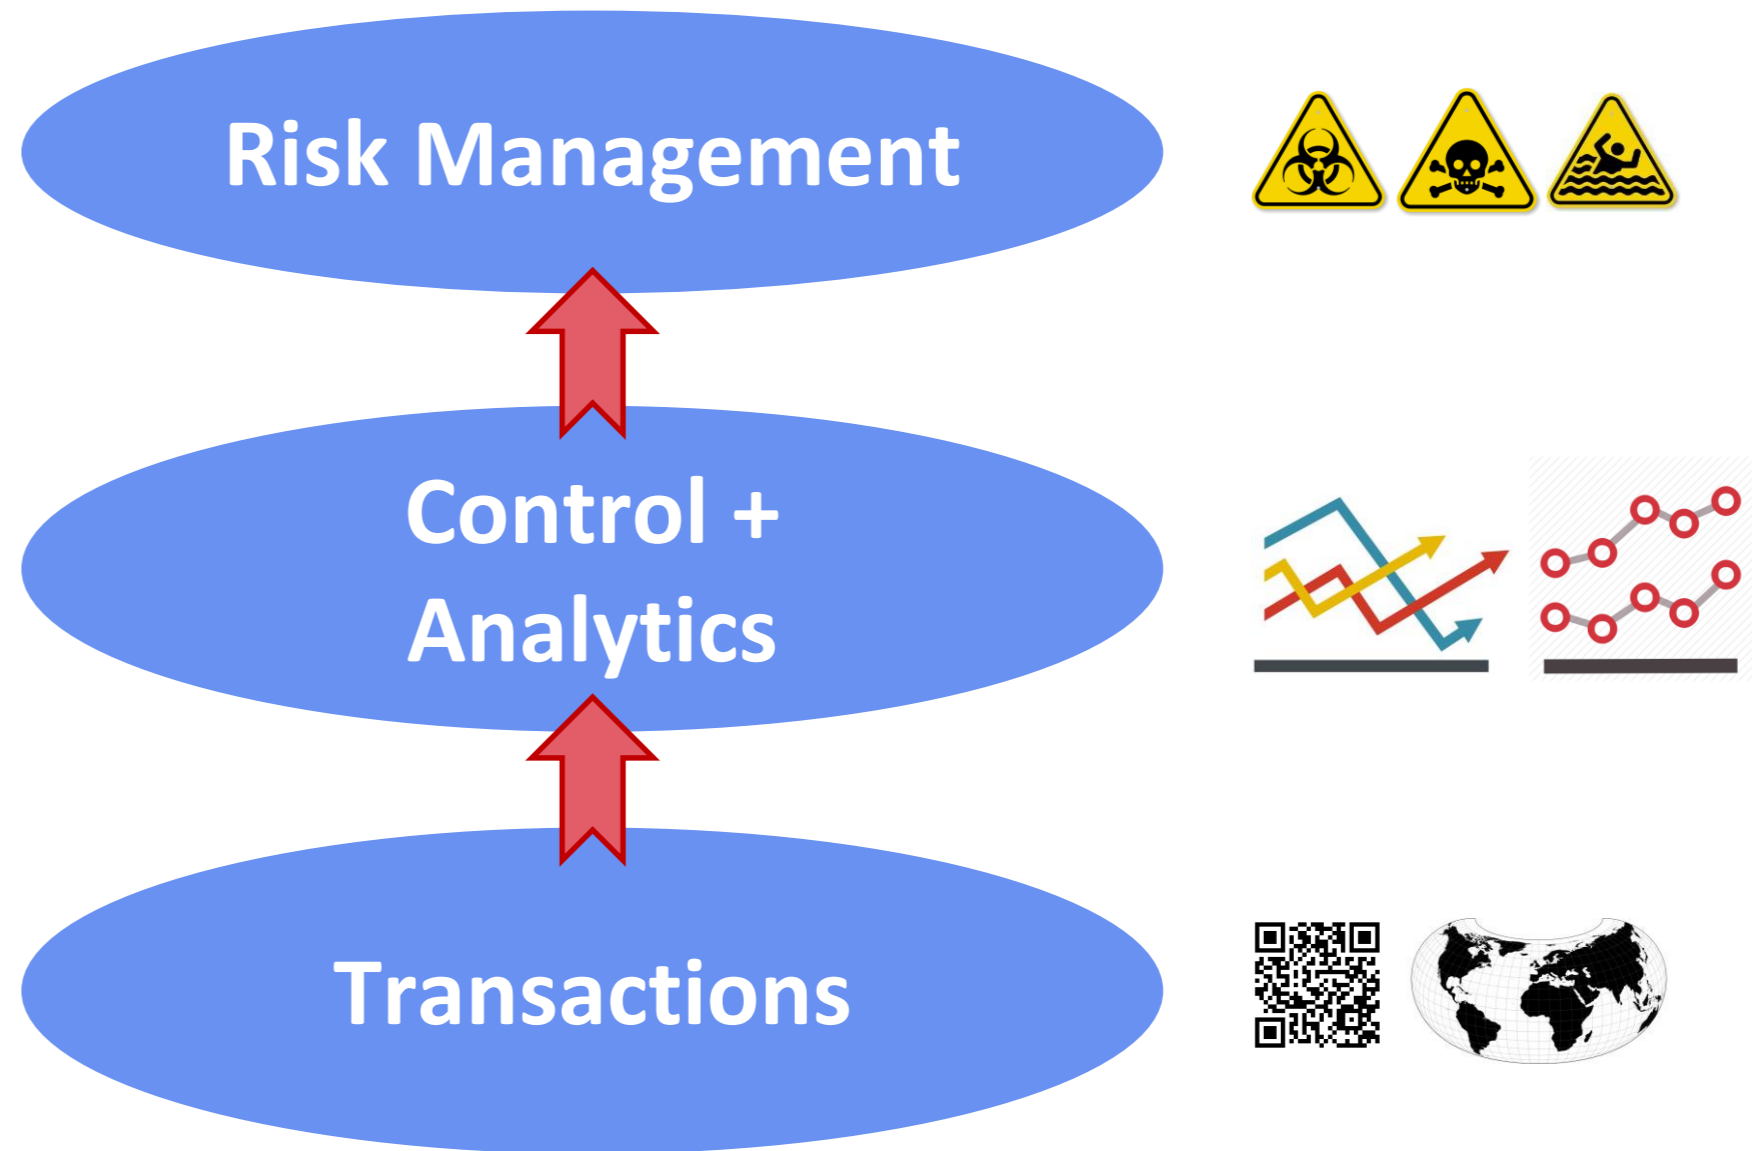

KitChain

An immutable digital inventory and event tracking model
for the pharmaceutical clinical supply chain

See the video at kitchain.org/video

Supply Chain Systems

- Unique identifiers for physical objects
- Flag & categorize bad transactions
 - Root-cause analysis
- Pro-actively query users

Next Generation Pharma Supply Chain?

- Personalized medicine & enhanced privacy
- Internet-of-things (IoT) all the way to patient
- FDA & DSCSA 2023 rollout
- Tracing vs tracking
- Value-added services

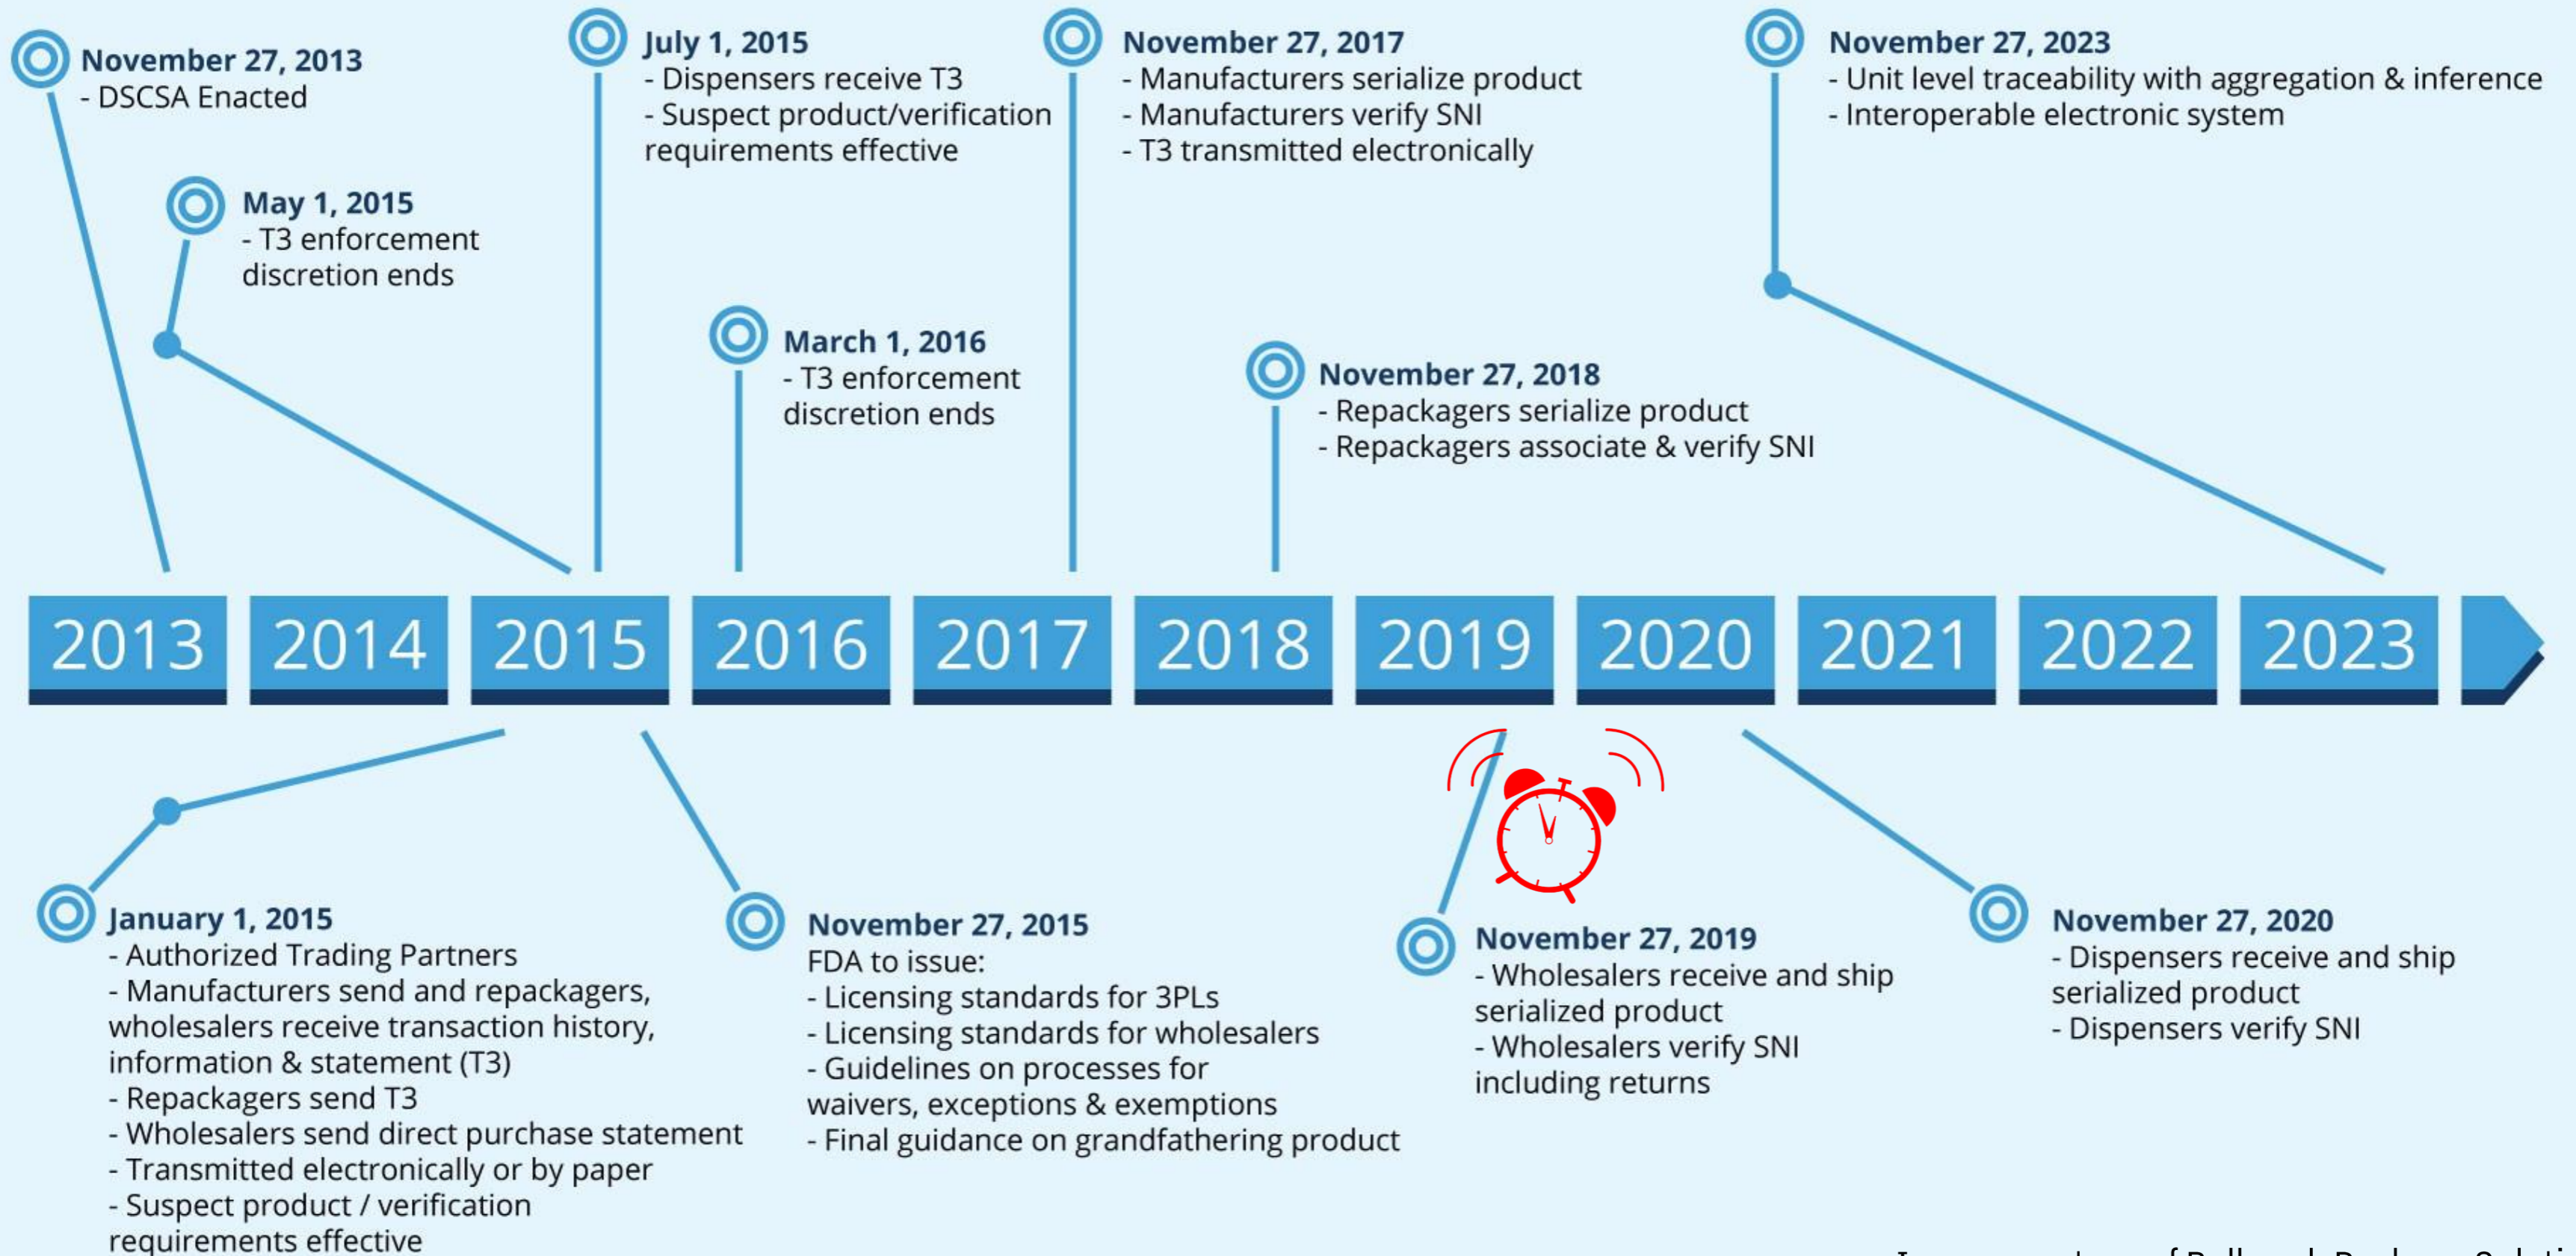

Commercial Supply: FDA & DSCSA

BRUINchain

- As part of the FDA DSCSA Pilot Project Program, we've partnered with UCLA to build and test a last-mile blockchain-based system with an iPhone client
- This application, BRUINchain, aims to demonstrate a successful implementation where product tracing notifications are sent automatically to key stakeholders
- UCLA Health will test it in a live environment as a way to help deliver life-saving medications to babies

Roadmap to 2023

- Chaincode portability, blockchain federation and integrability
- More robust models and standards for organizations and permissions
- Analytics on chain data
- Next-generation crypto and data models
- Integration with enterprise systems such as ERP & MES
- Designing for compliance with privacy laws (e.g. HIPAA, GDPR)

Blockchain, artificial intelligence & IoT combine to make every transaction
...instantaneous, confidential, unforgeable & trackable
